Engineering India's Sustainable Infrastructure — and its Digital Backbone

Railway · Industrial · Civil · Sustainability

DPIIT-recognised • MSME-registered • Make in India

Siliguri, West Bengal, India | www.navgrow.org | info@navgrow.org

Great engineering, held back by offline commerce

India's infrastructure sector is booming, yet the firms that build it still run on fragmented, offline processes.

1 Fragmented procurement

Buyers source safety gear, tools and machinery by phone, WhatsApp and paper quotes — slow, error-prone, no audit trail.

2 No digital storefront

Regional engineering suppliers rarely have a professional online presence, losing B2B buyers who now expect to order online with GST invoices.

3 Manual quote & tender cycles

RFQs, bulk pricing and tenders live in spreadsheets and email — days of turnaround and lost leads.

4 Weak digital discovery

Capable firms are invisible in search, ceding ground to larger, better-marketed players.

One brand. Services and commerce, unified.

Navgrow pairs on-the-ground engineering with a proprietary digital platform — selling services and products through one branded, GST-compliant system.

01

Engineering Services

Ten service lines across railway, industrial, civil, and sustainability — delivered end-to-end.

02

B2B E-commerce

A professional store for safety gear, tools & machinery — GST invoices, HSN codes, pan-India delivery.

03

Quote & RFQ Engine

Instant estimates, bulk pricing and a full RFQ workflow that turns enquiries into orders.

04

Digital Backbone

Coupons, delivery zones, analytics, notifications and SEO — one admin console runs it all.

Study the spec • get the method approved • execute under supervision • hand over audit-ready.

Ten Service Lines. One Standard.

1 Railway Infrastructure

3 Civil & Construction

5 Maintenance & AMC

7 Solar Energy Solutions

9 Energy Efficiency & Audits

2 Industrial Engineering

4 Government Contracts

6 Rainwater Harvesting

8 Wastewater Treatment & Recycling

10 Green Building & Sustainability

A production-grade system — already built

Storefront

Catalogue, search, wishlist, cart, GST-inclusive pricing with per-slab tax breakdown

Checkout

Razorpay online + Cash on Delivery, per-product delivery charges, coupon engine

RFQ & Quotes

Instant quote calculator, bulk enquiry, full RFQ lifecycle with accept/reject & validity

Content

News/blog, projects, gallery, careers with CV uploads — all SEO-optimised

Admin Console

Products, orders, coupons, delivery zones, tax rules, users, analytics, notifications

Trust & Compliance

JWT auth, audit logs, DLT-ready SMS, configurable email, invoices with HSN/SAC

Two large markets — Navgrow sits at their intersection

\$1.4T+

India's planned infrastructure pipeline (National Infrastructure Pipeline)

\$100B+

India B2B e-commerce opportunity as procurement moves online

63M+

MSMEs in India — the core buyers of industrial supplies & engineering

Beachhead: Siliguri & North Bengal — a strategic gateway to Northeast India, Nepal, Bhutan and Bangladesh. We expand outward from a defensible regional base.

Market figures are indicative context from public sources; not company revenue.

Diversified revenue that cross-sells

1 Project & service contracts

Railway, industrial, civil and sustainability engineering — tendered and negotiated.

2 Product sales (B2B store)

Margin on safety gear, tools, machinery and consumables sold online and via RFQ.

3 Bulk & institutional supply

High-volume RFQ orders for contractors, factories and government bodies.

4 Maintenance & AMC

Recurring annual maintenance contracts — predictable, high-retention revenue.

Built on Trust. Proven by Delivery.

Quality-first, every time

ISI-marked materials, tested components, audit-ready documentation.

Approved-vendor discipline

Trained to Indian Railways & departmental norms; block-working ready.

One accountable partner

Design, supply, execution and maintenance under one named owner.

Owned technology

A proprietary platform — fast to adapt, cheap to scale.

BY THE NUMBERS

2022

Incorporated in Siliguri

10

Engineering service lines

100%

On-time project delivery

3

Government recognitions

24 hrs

Typical quotation turnaround

Anchor the region, then widen and expand

NOW

Anchor the region

Win North Bengal B2B buyers and local projects; drive SEO, Google Business and directory presence.

NEXT

Widen the catalogue

Add product lines and suppliers; grow RFQ volume; convert content into inbound leads.

THEN

Expand geographically

Scale to the Northeast and metro industrial clusters; pursue larger tenders and institutional supply.

LATER

Platform leverage

Onboard partners/sellers onto the same rails; grow recurring AMC revenue.

The Ask

We're raising to accelerate what's already built — turning a working platform and regional base into a category leader.

1 Inventory & supply

Deepen the catalogue and secure supplier terms for faster fulfilment.

3 Operations & delivery

Warehousing and logistics to guarantee pan-India delivery SLAs.

2 Growth & marketing

SEO, performance marketing and a regional sales team to drive demand.

4 Team & technology

Engineering, category and support hires; continued platform investment.

Let's build what lasts — together.

Engineering Excellence. Sustainable Solutions.
